

1. Purpose

This policy describes how Brightloop employees protect company and customer data. It applies to all employees, contractors, and interns. Violations may lead to disciplinary action.

2. Passwords and Login

Passwords must be at least 14 characters long. Use the company password manager (1Password) for all work accounts. Multi-factor authentication (MFA) is mandatory for email, Loopcloud admin accounts, GitHub, and the HR portal. Hardware security keys are required for anyone with production access. Never share passwords, even with IT staff.

3. Devices

Company laptops must have full-disk encryption turned on and must lock automatically after 5 minutes of inactivity. Install operating system updates within 7 days of release. Personal devices may be used for email and chat only, and only if they have a screen lock and are enrolled in our device management system.

4. Customer Data

Customer warehouse maps and inventory data are classified as Confidential. Confidential data must never be copied to personal devices, personal cloud storage, or public AI tools. Customer data in Loopcloud is stored in the EU and is deleted 90 days after a customer contract ends.

5. Reporting a Security Incident

If you suspect a security incident - for example a lost laptop, a phishing email you clicked, or data sent to the wrong person - report it immediately in the #security-incidents Slack channel or by emailing security@brightloop.example. Lost or stolen devices must be reported within 1 hour of noticing. You will not be punished for reporting a mistake quickly.

6. Security Training

All employees complete security training during their first week and a refresher course every 12 months. Engineers also complete secure coding training once a year. Every quarter, IT runs a simulated phishing exercise.

7. Visitors

Visitors to any Brightloop office or test warehouse must sign in at reception, wear a visitor badge, and be accompanied by an employee at all times. Photography inside the test warehouse requires approval from the site manager.
